GENERAL

Electronic Hardware has been a manufacturer of transilluminated knobs for aircraft crew stations and related equipment for over 40 years. We are QPL approved to MIL-K-25049 and manufacture our knobs in accordance with SAE-AS-7788, NASM3926, MIL-L-85762, NVIS Green A and NVIS Green B. We are a major supplier to airframe manufacturers and their avionics equipment suppliers. We also supply directly to the government and the FAA.

Electronic Hardware Company's total capability to manufacture transilluminated knobs to your requirements starts with a complete review of your requirements. Our in-house capabilities include engineering, mold design, tooling, fabrication, marking, finishing and light testing. Our quality system is in accordance with MIL-1-45208 and certified to ISO 9001-2008. We have over 25,000 square feet dedicated to knob manufacture. Our unique molding method provides low cost tooling for your requirement. We utilize cellular manufacturing for assembly and finishing which provides superior quality and efficiency, and results in lower costs to you, our customer. The knobs shown are made to industry and or MIL standards. The shaft depth counter bore depth, diameter, set screw position, marking, and color can be altered by request.

ILLUMINATION

Shall be shown as a percent of transmittance, defined as the percentage ratio of the brightness of the marking to the brightness of the light source applied at the bottom of the knob.

These readings are determined through the use of a light source which presents an evenly diffused circular lighted area. The shaft hole of the knob under test shall be plugged with an opaque material and the knob shall be placed concentrically over the circle of light and shall overlap it by .06 inch on all sides.

Light measurements shall be at five points along the index line, except over the metal insert on the top of the knob.

MARKINGS

To enhance lighting and angle of visibility, knurling or flutes in the area of marking may be removed. We utilize laser engraving, pad printing, and hot stamping to provide excellent definition of marking while maintaining cost effectiveness.

SPECIFICATIONS

Plastic: Thermoplastic molding compound, clear for transilluminated knobs and colored for non-illuminated knobs. The material used meets the requirements of SAE-AS-7788, MIL-L-85762, and NASM3926.

Inserts: Brass in accordance with QQ-B-626 (or equivalent).

Set Screws: Style to be NASM51021.

Finish: Knob Colors:

White, Color Number 37875 per FED-STD-595 reflectance may be reduced to 50% minimum. Markings shall meet daylight contrast of 9 minimum.

Gray, Color Number 36231 per FED-STD-595.

Black, Color Number 37038 per FED-STD-595.

Other colors are available upon request.

Bottom surface of illuminated knobs shall have no coating and shall be clear.

Inserts:

Nickel plated per QQ-N-290, Grade G, Class 2.

Tolerances: Dimensions are in inches.

Three-place decimal $\pm .010$

Two-place decimal $\pm .02$

Angles $\pm 2^\circ$

Illumination: Unless specified, illumination ratio to be $.05 \pm 25\%$, ex. Type III NVIS

This illustration is the method we utilize in obtaining brightness ratios. A uniformly illuminated source set to a specific brightness in foot lamberts. Photometric measurements are taken at 5 equally spaced locations along the marking, no readings are taken in the area above the metal insert. The average of the measurements (1-5) is the percentage of the brightness of markings to the brightness of the source. This is the brightness ratio, expressed as a decimal.

SERIES	See bottom of page for series designation.
STYLE NUMBER	See catalog page for assigned style number.
INDICIA CONFIG.	Refer to table on page 4T. Special marking available, but not limited to.
ILLUMINATION	0– knob backlighted in accordance with military specifications or customer requirements 1– knob without illuminated markings NOTE: Lighting requirements must be specified separately.
COLOR OF KNOBS	B– black lusterless, color number 37038 of FED-STD-595 G– gray lusterless, color number 36231 of FED-STD-595 metal finish, anodize in accordance with MIL-A-8625 See table on page 4T for additional colors. NOTE: White markings on all knobs to be lusterless, 37875 of FED-STD-595.

SHAFT SIZE	1–.125 Round		1–.125 Round
	2–.125 "D" Flat by .105		2–.125 "D" Flat by .105
	3–.250 Round		3–.250 Round
	4–.250 "D" Flat by .216		4–.250 "D" Flat by .216

NOTE:
Other sizes
available by
custom part
number.

NOTE: Round shafts are not recommended for use in aircraft. "D" flat perpendicularity to be $\pm 1^\circ$

MATERIALS

Resins—much of the growth of the injection molding industry is due to the continuing ability of resin suppliers to offer new and improved engineering materials. Today resins can meet specifications for mechanical, thermal, electrical and impact demands increasingly competitive in performance to metal at reduced processing costs. EHC's participates in an ongoing evaluation process of new resins. Moldability, ease of processing and decoration are some of the analysis conducted. This process provides for a continuing effort to improve current production needs and prepare for future program demands.

- Good Mechanical Strength and Illumination are of primary concern when choosing our materials. strength is needed numerous reinforcements are used including glass fibers, mineral fillers, glass microspheres, all products that improve impact resistance.
- Electrical Resistance or Insulation make the use of EHC plastic products especially suited in electro-mechanical environments.

The plastic materials used in EHC parts have been carefully selected to meet the functional and aesthetic requirements of each product.

Thermoplastic – Materials with technical characteristics such as polycarbonate unless otherwise requested by customers.

MATERIAL SPECIFICATIONS

INSPECTION

Standard

Parts are considered commercially non-acceptable if an imperfection is visible when viewed at arm's length distance under normal lighting conditions. Parts will be viewed for a period not to exceed 3-5 seconds in daylight (or fluorescent light of approximately 70 foot candles) with the unaided eye at normal viewing distance of 24 inches, in the normal viewing plane.

Special

Jewelry-type inspection will be reflected in a higher unit-cost. Customer to provide EHC with written notice in advance of placement of order.

CHEMICAL RESISTANCE

Contact manufacturer for resistance factors prior to usage with chemicals.

Surface Finish

1. Gloss: Parts produced from a highly polished mold, or
2. Satin: Parts produced from a textured mold to remove glossiness,
- or
3. Textured: Parts produced from a pattern etched mold, or
4. Matte-finish: Parts produced from a secondary operation that provides a non-reflective plastic surface.

Appearance

Parts to be free of shrinkage in excess of .009" IN/IN on top surface and sides of molded knob, mold flow marks or "cold" spots, molding flash, chips or cracks, excessive gate marks and colors (for knob and skirt assemblies) to be consistent in shade and density for each order lot or release.

MARKINGS

Adhesion:

Markings cannot be removed from plastic surface by an adhesive material comparable to scotch tape.

Inspection: See opening paragraph.

Appearance:

All characters, lettering, border, and backgrounds must be complete and all lettering must be clear, visible, and legible. Colors to be consistent in shade and density for each order lot or release.

SET SCREWS

Hexagon Socket

1. Material: high grade alloy steel
2. Finish: Corrosion resistant/coating with clear or black finish
3. Hardness: Case hardened
4. Finish: Clear corrosion resistant coating
5. Point Style: Cup point

Location (nominal) of Screw(s) (if applicable)

Two (2) set screws at 45° from 12 o'clock or 90° and 180° from indicator.

Thread

Class 3A

Screw Size and Length

Determined by manufacturer.

INSERTS

1. Material: Aluminum or half-hard brass alloy.
2. Finish Options: Nickel plate on brass or Anodized on aluminum.

Thread

Thread Fit: 2B gauge

PACKAGING

All products are packaged to insure that quality is not jeopardized during transit. Relative to the complexity of the part, product is:

- A. Individual bags, or
- B. Egg crate box w/ foam pads on top and bottom

PRODUCT DIMENSIONS: XX = $\pm .02"$ and XXX = $\pm .010"$
unless otherwise specified.

PRODUCT CONCENTRICITY: .020" TIR

SHAFTHOLE DIAMETERS

Round Shaft Hole: $\pm .002"$

Round Shaft Hole with Flat: $\pm .0035"$

Knurled Shaft Hole:

Solid Shaft: $\pm .002"$

Split Shaft: $\pm .0035"$

TORQUE SPECIFICATIONS

Torque is defined as the number of pounds required to strip molded-in inserts and stud heads from molded plastic part, flatten metal spring clip, strip serration of knurled plastic shaft hole or strip head of set screw.

Spring Clip Shaft Hole

Spring Diameter	Stripping Torque Inch Lbs.
.125	10
.187	17
6 mm	25
.250	25

Knurled Type Shaft Hole: All types 15 inch lbs.

Set Screws

Screw Size	Threads Per In.	Head Stripping Torque Inch Lbs.
#3	48	3-1/2
#4	40	4-3/4
#6	32	8-3/4
#8	32	18
#10	32	32

SHAFT HOLE SPECIFICATIONS

Shaft hole fit per customer specifications can be provided for an additional charge. Sample shaft and tension requirements must be forwarded to manufacturer.

INSERTS WITH THREADED I.D.

(Standard Series and Selected Combinations – Unified Screw Threads)

Thread Fit: 2B Gauge

Thread Type

#6-32 UNC 2B
#8-32 UNC 2B
#10-32 UNF 2B
1/4-20 UNC 2B
5/16-18 UNC 2B

7/16-14 UNC 2B
1/2-13 UNC 2B

SALES TERMS & AGREEMENTS

TERMS:

Our terms of sale are 1/10 net 30 FOB Farmingdale, NY.
Terms on tooling are 50% with order balance upon sample approval.

RETURNS:

All returns must be approved by EHC and be assigned an EHC RMA number.

QTY VARIANCE:

We reserve the right to over or under ship 10% on orders for non-standard parts.

SHIPMENTS:

Usually UPS or FedEx prepaid and added, unless otherwise specified.

DELIVERY:

Immediate and just-in-time delivery is available on most standard items.

SPECIFICATIONS FOR NON-STANDARD PRODUCTS
MUST BE APPROVED BY EHC. SPECIFICATIONS WHICH CALL FOR CLOSER TOLERANCES, ENHANCED PHYSICAL PROPERTIES, OR MORE STRINGENT VISUAL REQUIREMENTS THAN THOSE PREVIOUSLY LISTED MUST HAVE SPECIFIC APPROVAL OF EHC'S SALES AND MANUFACTURING ORGANIZATIONS.

NOTE: SHRINKAGE, TOOLMAKERS VARIATIONS FROM CAVITY TO CAVITY, LIFE-CYCLE OF TOOLING, MATERIALS FROM MULTIPLE VENDORS, HUMIDITY, ETC. ALL HAVE AN EFFECT ON THE NORMAL DIMENSIONS OF PLASTIC PARTS. A PREMIUM CHARGE WILL BE ADDED TO THE UNIT-COST FOR THOSE CUSTOMERS REQUIRING EXACT TOLERANCES AND APPEARANCE. CONTACT MANUFACTURER FOR ADDITIONAL CHARGES.

STORAGE OF CUSTOMER OWNED ARTWORK PREPARATION, RAW MATERIALS AND SUPPLIES, AND TOOLING.

CUSTOMER SHALL NOTIFY EHC OF DISCONTINUANCE OF PRODUCT FOR WHICH CUSTOMER HAS PURCHASED ITEMS SO THAT ARRANGEMENTS CAN BE MADE TO RETURN OR DISCARD THEM. OUR STANDARD PRACTICE ASSUMES THAT ITEMS NOT USED BY THE CUSTOMER FOR A PERIOD OF TWO YEARS WILL BE CONSIDERED OF NO VALUE AND CUSTOMER WILL BE NOTIFIED OF OUR DECISION. FAILURE OF CUSTOMER TO RESPOND TO INQUIRY LEAVES DISBURSEMENT OF ITEMS AT THE DISCRETION OF EHC (AT NO CHARGE OR OBLIGATION).

We carry a comprehensive line of quality clamp and ball knobs.
